

UV-C Oxidizer Air Purifier for Professionally Sized Commercial Applications

According to the EPA, the air inside your commercial building may be up to 10 times more polluted than the air outside. Dramatically improve the air you, your co-workers and customers breathe with Air Lab Werks new UV-C Oxidizer Air Purifiers. The unique design of this product enables air quality professionals to select from four custom lamp designs, each with unique air cleaning/purifying capabilities, and customize Air Lab Werks purifiers to suit the user's specific air cleaning requirements.

Models available:

- 9101: Dual lamp UV-C for mold mildew, bacteria, yeasts, protozoa, and virus control
- 9102: Dual lamp OX tri-oxygen for removal of gases and odors in areas with heavy odor loads
- 9103: One OX tri-oxygen/One UV-C lamp for moderate odor loads plus mold/mildew control
- 9104: One 5050 combination lamp/One UV-C lamp for light odor loads plus mold/mildew control
- 9105: One 5050 combination lamp/One OX tri-oxygen lamp for odor control flexibility
- 9106: One 6040 combination lamp/One UV-C lamp for light maintenance purifying
- 9107: One 5050 combination lamp/One 6040 combination lamp for light odor control flexibility

Air quality professionals determine the model appropriate for users cleaning requirements based upon simple variables such as square footage of space where cleaning is required and odor/gas/mold levels.* Maintenance of Air Lab Werks models require only annual lamp replacement and operate on just pennies per day!

SPECIFICATIONS:

- Low wattage, custom air purification lamps
- Fuse protected
- Lighted off/on switches
- Low maintenance
- 120v plug and cord standard
- Portable, Easy to use
- All metal enclosure
- Purification output light
